

Technology you can rely on!

ROHDE 

The kiln that comes to meet you.

Brand new!

ELS[®] 200
Ergo Load System

The kiln that comes
with a floor on castors.

It needs as much space as a frontloader, but has the advantages of a truck kiln. It is a kiln made with tried and tested ROHDE quality.

- **The kiln floor on castors** – a new way of loading a kiln:
- **Ergonomically designed**, makes it easier to load from three sides and is kind to your back.
- **Economic**, with better visibility you can load faster and more densely.
- **Energy efficient due to high-quality**, 3-layer insulation with in-frame ventilation.

1. Open the door to 180°.

2. Pull out the mobile table frame.

3. Pull out the kiln floor on castors.

4. Load and unload.

For more details on the ELS 200 please contact us or your specialised retailer.

Technology you can rely on!

ROHDE

With the ELS® kiln series we have designed a new kiln concept.

The kiln floor on castors can be pulled out easily due to a smoothly running mechanism. This makes the goods accessible from three sides.

Loading becomes faster, easier and denser.

Even very heavy pieces can be put inside the kiln ergonomically without any problems.

Of course all features of ROHDE frontloaders are combined in this kiln series.

Features of the ELS 200 kiln series

- Smoothly running kiln floor on castors, steel on steel
- Adjustable mobile table frame, balances an uneven floor
- Safe and reliable floor heating
- In-frame ventilated kiln construction
- Heating elements mounted on carrying tubes, on 5 sides
- Performance regulated with silent and wearfree Solid State Relays
- Ceiling support "System ROHDE"
- 3-layer, energy-efficient insulation, in-frame ventilated

Corrosion protection and low surface temperature due to in-frame ventilation

Heating elements mounted on carrying tubes

Silent and wearless Solid State Relays with exterior cooling element

Easily adjustable kiln stand

Detail kiln floor on castors

Easily adjustable door, easy to take off for transport and set-up
